Patient questionnaires:

Please fill out the following questionnaires and bring them to your appointment.

We are currently in the process of studying the program to evaluate whether it is an effective tool for stress and burnout recovery. All information will be kept confidential. No personal information will be used to identify your data. If you do not want to participate in the evaluation, please let Dr. Vaidya know. She will still need this information for your personal assessment.

Participant ID: Date											
Please answer as accurately as you can. Also, please feel free to ask me if you want any clarifications. This information will be kept confidential and any information used for data purposes will not link you to any of the information you provide.											
1. Do you identify as (circle) male / female / other?											
2. Age											
3. Marital status (circle) Single Married Common-law Other partner Separated Divorced Widowed Other											
4. a. Are you currently employed? (circle) Yes / No											
b. If employed, what type of work do you do?											
In the past month , have you missed any days of work due to illness or stress (circle) Yes / No;											
If yes, how many days?											
c. If you are not currently employed, are you (please circle the most fitting) on disability? looking for employment? a caregiver? a student? retired? If yes, how many years?											
5. My family's/household income level per year is (please circle one)											
<\$20,000 \$20,000-50,000 \$50,001-80,000 \$80,001-120,000 >\$120,000											
6. My highest level of education is (please circle)											
not graduated from high school high school college bachelor's master's doctorate post-doctorate											

De Jong-Gierveld 6-point Loneliness Scale

1. I experience a general sense of emptiness

a. Yes

b. More or Less

c. No
2. I miss having people around mea. Yesb. More or Lessc. No
3. I often feel rejecteda. Yesb. More or Lessc. No
 4. There are plenty of people I can rely on when I have problems a. Yes b. More or Less c. No
5. There are many people I can trust completelya. Yesb. More or Lessc. No
 6. There are enough people I feel close to a. Yes b. More or Less c. No

4-6 Response Score Yes 0, More or less 1, No 1

Burnout Self-Test Maslach Burnout Inventory (MBI)

The Maslach Burnout Inventory (MBI) is the most commonly used tool to self-assess whether you might be at risk of burnout. To determine the risk of burnout, the MBI explores three components: exhaustion, depersonalization and personal achievement. While this tool may be useful, it must not be used as a scientific diagnostic technique, regardless of the results. The objective is simply to make you aware that anyone may be at risk of burnout.

For each question, indicate the score that corresponds to your response. Add up your score for each section and compare your results with the scoring results interpretation at the bottom of this document.

Questions	Never	A few times per year	Once a month	A few times per month	Once a week	A few times per week	Every day
SECTION A	0		2	3	4	5	6
I feel emotionally drained by my work.							
Working with people all day long requires a great deal of effort.							
I feel like my work is breaking me down.							
I feel frustrated by my work.							
I feel I work too hard at my job.					<u> </u>		
It stresses me too much to work in direct contact with people.							
I feel like I'm at the end of my rope.							
Total score - SECTION A							

Questions	Never	A few times per year	Once a month	A few times per month	Once a week	A few times per week	Every day
SECTION B	0	100.1	2	3	4	5	6
I feel I look after certain patients/clients impersonally, as if they are objects.							
I feel tired when I get up in the	-						
morning and have to face another day at work.							
I have the impression that my							
patients/clients make me responsible							
for some of their problems.							
I am at the end of my patience at the end of my work day.							
I really don't care about what happens to some of my patients/clients.							
I have become more insensitive to people since I've been working.							
I'm afraid that this job is making me uncaring.							
Total score - SECTION B							

Questions	Never	A few times per year	Once a month	A few times per month	Once a week	A few times per week	Every day
SECTION C	0	1.444	2	3	4	5	6
I accomplish many worthwhile things in this job.							
I feel full of energy.							
I am easily able to understand what my patients/clients feel.							
I look after my patients'/clients' problems very effectively.							
In my work, I handle emotional problems very calmly.							
Through my work, I feel that I have a positive influence on people.							
I am easily able to create a relaxed atmosphere with my patients/clients.							
I feel refreshed when I have been close to my patients/clients at work.							
Total score – SECTION C							

SCORING RESULTS - INTERPRETATION

Section A: Burnout

Burnout (or depressive anxiety syndrome): Testifies to fatigue at the very idea of work, chronic fatigue, trouble sleeping, physical problems. For the MBI, as well as for most authors, "exhaustion would be the key component of the syndrome." Unlike depression, the problems disappear outside work.

- Total 17 or less: Low-level burnout
- Total between 18 and 29 inclusive: Moderate burnout
- Total over 30: High-level burnout

Section B: Depersonalization

"Depersonalization" (or loss of empathy): Rather a "dehumanization" in interpersonal relations. The notion of detachment is excessive, leading to cynicism with negative attitudes with regard to patients or colleagues, feeling of guilt, avoidance of social contacts and withdrawing into oneself. The professional blocks the empathy he can show to his patients and/or colleagues.

- Total 5 or less: Low-level burnout
- · Total between 6 and 11 inclusive: Moderate burnout
- Total of 12 and greater: High-level burnout

Section C: Personal Achievement

The reduction of personal achievement: The individual assesses himself negatively, feels he is unable to move the situation forward. This component represents the demotivating effects of a difficult, repetitive situation leading to failure despite efforts. The person begins to doubt his genuine abilities to accomplish things. This aspect is a consequence of the first two.

- Total 33 or less: High-level burnout
- Total between 34 and 39 inclusive: Moderate burnout
- · Total greater than 40: Low-level burnout

A high score in the first two sections and a low score in the last section may indicate burnout.

Insomnia Severity Index (from Charles M. Morin, PhD, Universite Laval).

Please rate the current (ie last 2 weeks) severity of your insomnia problems:

Insomnia Problem	None 0	Mild 1	Moderate 2	Severe 3	Very Severe 4
1. Difficulty falling asleep					
2. Difficulty staying asleep					
3. Problems waking up too					
early

Perceived Stress Scale

Adapted from Cohen, S. (1994) Perceived Stress Scale

This is a measure of the degree to which you are experiencing stress in your various life situations. For each item, choose the number that best describes you by choosing one of the five boxes to the right of the statement according to the following scale:

In the last month, how often	0 =	1 =	2 =	3 =	4 = very
have you	never	Almost	sometimes	fairly	often
, and the second		never		often	
1. been upset because of					
something that happened					
unexpectedly?					
2. felt that you were unable to					
control the important things					
in life?					
3. felt nervous or "stressed"?					
4. felt confident about your					
ability to handle your personal					
problems					
5. felt that things were going					
your way?					
6. found that you could not					
cope with all the things that					
you had to do?					
7. been able to control					
irritations in your life?					
8. Have you felt that you were					
on top of things.					
9. been angered because of					
things that were outside of					
your control?					
10. felt difficulties were piling					
up so high that you could not					
overcome them?					

Total score:

Sheehan Disability Scale

This validated scale assess the impact of the burnout, panic, anxiety, phobia, or depressive symptoms on three major sectors in life - work/school, social life, and family/home responsibilities

Work/School -The symptoms have disrupted your work/school work:

Not at all	Mildly		Mod	Moderately I			kedly		Extremely	
0	1	2	3	4	5	6	7	8	9	10

Social Life – The symptoms = have disrupted your social life/leisure activities

Not at all	Mildly		Mod	eratel	У	y Marked			Extremely	
0	1	2	3	4	5	6	7	8	9	10

Family Life/Home Responsibilities

Not at all	Mildly		Mod	eratel	У	Markedly			Extremely	
0	1	2	3	4	5	6	7	8	9	10

DAYS LOST – On how many days in the last week did your symptoms cause you to miss school or work or leave you unable to carry out your normal daily responsibilities? _____

DAYS UNPRODUCTIVE - On how many days in the last week did you feel so impaired by your symptoms that even though you went to school or work, your productivity was reduced?

<u>GAD – 7</u>

During the last 2 weeks, how often have you been bothered by the following problems?

Not at all	Several days	More then half of the	Nearly every day
0	1	days 2	3
		days	days then half of the days

If you checked off any problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people?

Not difficult at all Somewhat difficult Very Difficult Extremely Difficult

Scoring: Mild Anxiety 5-9 Moderate anxiety 10-14 Severe Anxiety 15-21

Patient Health Questionnaire (PHQ-9)

Over the past 2 weeks, how often have you been bothered by any of the following problems?

	Not at all	Several days	More than half of	Nearly every Day
	0	1	the days	3
1. Little Interest or pleasure in doing things				
2. Feeling down, depressed or hopeless				
3. Trouble falling or staying asleep				
4. Feeling tired or having little energy				
5. Poor appetite or overeating				
6. Feeling bad about yourself, or that you are a failure or have let yourself or your family down				
7. Trouble concentrating on things such as reading the newspaper, or watching TV				
8. Moving or speaking so slowly that other people could have noticed. Or the opposite – being so fidgety or restless that you have been moving around a lot more than usual				
9. Thoughts that you would be better off dead or of hurting yourself in some way

SELF-COMPASSION SCALE-Short Form (SCS-SF 2)

HOW I TYPICALLY ACT TOWARDS MYSELF IN DIFFICULT TIMES

Please read each statement carefully before answering.

Answer the following on a scale of 1-5, with (1) ALMOST NEVER to (5) ALMOST ALWAYS

I don't like.
3. When something painful happens I try to take a balanced view of the situation.
5. I try to see my failings as part of the human condition.
6. When I'm going through a very hard time, I give myself the caring and tenderness I need.
7. When something upsets me I try to keep my emotions in balance.
10. When I feel inadequate in some way, I try to remind myself that feelings of inadequacy are shared by most people.
Answer the following on a scale from 1- 5,with (1) ALMOST ALWAYS to (5)
ALMOST NEVER (the scale is reversed).
ALMOST NEVER (the scale is reversed). 1. When I fail at something important to me I become consumed by feelings of inadequacy.
1. When I fail at something important to me I become consumed by feelings of
1. When I fail at something important to me I become consumed by feelings of inadequacy4. When I'm feeling down, I tend to feel like most other people are probably

Readiness for Change

How important is it for you to make a change?

0-1-2-3-4-5-6-7-8-9-10

How Confident are you about making this change?

0-1-2-3-4-5-6-7-8-9-10

How ready are you to make this change?

0-1-2-3-4-5-6-7-8-9-10

Follow up questions:

Why are you at your current score and not zero?

What would it take for you to get to a higher score?

ADVERSE CHILDHOOD EXPERIENCE SCORE

The Adverse Childhood Experience (ACE) Score was developed by Dr. Vincent Fellitti at Kaiser Permanente in San Diego California in conjunction with Center for Disease Control (CDC) in Atlanta Georgia. It was first published in 1997.

Results showed adult patients who experienced higher stress/adverse experiences in childhood, had higher incidences of Depression and Anxiety (correlated with ACE score of 2 or higher), and Chronic Illness (correlated with score of 4 or higher). We are now screening them in the Medical Field, to identify those who are at risk for chronic illness, so we can help people make changes earlier.

For more information on the ACE score, check out the following links:

https://www.acesconnection.com/blog/got-your-ace-resilience-scores

Watch the TED TALK by Dr. Nadine Burke Harris:

https://www.ted.com/talks/nadine_burke_harris_how_childhood_tr auma_affects_health_across_a_lifetime?language=en

The ACE Questionnaire follows. It asks sensitive and private questions about your childhood. You may never have discussed these events with anyone. If you feel filling out this score may trigger you, please wait until your assessment with Dr. Vaidya

Adverse Childhood Experience Score

While you were growing up, during your first 18 years of life: Answer: NO = 0, Yes = 1

1. Did a parent or other adult in the household often or very often swear at you, insult you, put you down, or humiliate you? OR act in a way that made you afraid that you might be physically hurt?	
2. Did a parent or other adult in the household often or very often push, grab, slap, or throw something at you? OR did they ever hit you so hard that you had marks or were injured?	
3. Did an adult or person at least 5 years older than you ever touch or fondle you or have you touch their body in a sexual way? OR did they ever attempt or actually have oral, anal, or vaginal intercourse with you?	
4. Did you often or very often feel that no one in your family loved you or thought you were important or special? OR did you feel that your family didn't look out for each other, feel close to each other, or support each other?	
5. Did you often or very often feel that you didn't have enough to eat, had to wear dirty clothes, and had no one to protect you? OR that your parents were too drunk or high to take care of you or take you to the doctor if you needed it?	
6. Were your parents ever separated or divorced?	
7. Was your mother or stepmother often or very often pushed, grabbed, slapped, or had something thrown at her? OR sometimes, often, or very often kicked, bitten, hit with a fist, or hit with something hard? OR ever repeatedly hit at least a few minutes or threatened with a gun or knife?	
8. Did you live with anyone who was a problem drinker or alcoholic or who used street drugs?	
9. Was a household member depressed or mentally ill, or did a household member attempt suicide?	
10. Did a household member go to prison?	

Now add up your "Yes" answers: _____ This is your ACE Score.

RESILIENCE Questionnaire

1.I believe that my mother loved me when I was little.
